

Daily Dossier

3rd January 2018

Outlook

Nifty ended 0.01% up at 10443.20. Another lackluster session ended with a bearish candle. However, pivotal support of 10400 is still intact and may continue to act as the immediate base for the bulls. On the other hand, weakness may persist as long as it trades below 10490. 10550 is the next resistance. Below 10400, Nifty can retest 10350. Further, despite continuation of lackluster sessions stock specific movements remained the dominant flavor of the market. Hence, stock and sector specific strategies instead of index based strategies might get you favorable outcomes.

On the Nifty hourly chart; it opened gap-up but failing to hold early morning positive momentum led to another bearish closing. However, 100 hourly EMA placed around 10430 is still well intact.

Nifty patterns on multiple time frames show, it may remain lackluster as long as it trades below 10490. Nifty trading range for tomorrow is expected to be 10400 to 10490. Either side successful breakout will determine next leg of movement.

**Nifty Crucial Supports & Resistances for tomorrow-
Supports- 10400, 10350 Resistances- 10490, 10550**

Horticulture crop output seen at record 305.4 mt in 2017-18

Production of horticulture crops like vegetables and fruits is likely to touch a record 305.4 million tonnes (mt) in 2017-18, about 1.6% higher than the previous year and 8% higher than the previous five years' average. Within horticulture, production of vegetables is estimated at 181 mt in 2017-18, about 1% higher than the year before, while that of fruits is estimated at 95 mt, 2% higher than the previous year. The record production during 2017-18 will mark the sixth straight year of horticulture production outstripping that of food grains (estimated at 276mt in 2016-17), suggesting a structural change in Indian agriculture where farmers are increasingly growing perishable commercial crops due to a growing market and a quicker cash flow as these crops require less time from sowing to marketing. However, price volatility continues to be a major risk in horticulture, with prices of onions, tomatoes and potatoes plunging below growing costs several times last year.
