

16 July 2020

The Nifty ended 1.15% up at 10,739.95. It opened on a flat note and remained range-bound in the first half, however aggressive buying in the last half helped the benchmark index closing above 10,700 levels. It ended the session with a hammer candle. However, staying cautious on rise around 10,800 is advised.

On the Nifty hourly chart; RSI is still down trending. 100 EMA played a critical support, which means failing to maintain 100 EMA may cause further downfall towards 10,530 and 10,470 levels. Hence staying cautious on rise is advised.

Nifty patterns on multiple time frames suggest; it found support around 10,600 levels towards finishing off in green. However breaking out 10,800 decisively still looks difficult.
