

The Nifty previous session ended 1.24% up at 15,108.10. It opened gap-up and continued trading on a positive note towards finishing off with a bullish body candle. Closing above the critical resistance placed around 15,000 brightens the possibility of further up-move towards 15,340 levels. Midway resistance is placed around 15,240 levels. However, before that, a minor retracement towards thick support placed around 15,000-14,950 is likely.

On the Nifty hourly chart; both the leading indicators have reached overbought zone, which may push the benchmark index into minor retracement towards 15,000 levels. However, sharply rising ADX suggests intraday dips towards critical supports may again find buyers.

Nifty patterns on multiple time frames suggest; breaking out 15,000 with a gap-up opening suggests strength, which might be helpful in continuing this bullish momentum further towards 15,240 and 15,340 levels.
