Fundamentals

Mentha oil yesterday settled down by -0.71% at 1007.1 as average yield in Barabanki is improved by 5-6 kgs per acre due to better weather. Prices gained in recent sessions due to the rotting of the crop due to stagnant water in the field. The past few weeks have been painful as heavy rains in the pre-monsoon season have damaged the mentha crop which was ready for harvesting. Due to drowning in the water, the rows have started to wither. With the harvesting of the crop, oil extraction work has also started. However upside seen limited as arrivals likely to increase due to favourable weather conditions. Daily arrivals should gradually pick up to 400-500 drums in next 7-10 days. Last week, prices rallied. The Lucknow-based Central Institute of Medicinal and Aromatic Plants estimates that this adverse effect of rains on the crop is expected to reduce production by 30% in the last two weeks. The crop is prone to rain because the leaves of the crop start falling due to waterlogging in the field. Most of the farmers have planted Mentha crops and this rain is not less than acid for 50 percent of Mentha crop. In Sambhal spot market, Mentha oil dropped by -14.9 Rupees to end at 1097.2 Rupees per 360 kgs. CAI demand for withdrawal of 10 per cent customs duty on cotton imports. Trade body Cotton Association of India (CAI) has expressed concerns of India losing its competitiveness to China, Pakistan and Bangladesh in the international market. With 10 per cent customs duty on cotton varieties including extra-long staple (ELS), the export-oriented garments and cotton-madeups become costlier thereby giving an edge to the close competitors. The 10 per cent customs duty was imposed on cotton imports on February 2, 2021. The CAI has written a letter to the Union Finance Minister Nirmala Sitharaman seeking the withdrawal of duty. In the letter, Atul Ganatra, President, CAI, said that India produced merely 5-6 lakh bales (each of 170 kg) of ELS variety of cotton as against the local requirement of about 12 to 15 lakh bales of ELS and about 5-7 lakh bales of non ELS contamination-free sustainable cotton. Fundamentals

Jeera yesterday settled down by -0.08% at 13175 amid excess supply and as demand is likely to remain subdued on weak buying from local and overseas markets. Farmers need money to start sowing the kharif crop and they are bringing huge stocks to sell in the market after the easing of Covid-related restrictions. In the benchmark market Unjha, 7,000 bags (1 bag = 55 kg) arrived yesterday as against 10,000 bags. As India struggles against curbing the Corona pandemic, exports markets have turned subdued. The importers prefer to wait for the situation to normalize before negotiating for fresh deals. They rather prefer to clear their older stocks first and presently they feel that the older inventory may be sufficient to balance the existing demand for next few weeks easily. The new season arrivals shall continue with good numbers hence there will be ample availability in the market. However from a broader perspective, India's exports outlook has brightened while crop is expected to be lower versus year on year. Also, the nearest export competitors i.e. Turkey and Syria may not supply much to the world due to lower exportable surplus. In Unjha, a key spot market in Gujarat, jeera edged down by -20 Rupees to end at 13580 Rupees per 100 kg. Technically market is under long liquidation as market has witnessed drop in open interest by -11.99% to settled at 4185 while prices down -10 rupees, now Jeera is getting support at 13140 and below same could see a test of 13105 levels, and resistance is now likely to be seen at 13220, a move above could see prices testing 13265.
