### **Oil extends gains ahead of G7 discussions on Russian exports**

Oil prices extended gains as investors stood on guard for any moves against Russian oil and gas exports that might come out of a meeting of leaders of the Group of Seven (G7) nations meeting in Germany. The prospect of more supply tightness loomed over the market as western governments sought ways to cut Russia's ability to fund its war in Ukraine, even though G7 leaders were also expected to discuss a revival of the Iran nuclear deal which might lead to more Iranian oil exports. However, oil prices remained well supported above \$100 a barrel while prompt monthly spreads remained wide in backwardation as crude and oil product supplies remained tight. Backwardation occurs when prompt prices are higher than prices for delivery in future months, indicating tight supplies. G7 leaders, who began their meeting on Sunday, are expected to discuss options for tackling rising energy prices and replacing Russian oil and gas imports, as well as further sanctions that do not exacerbate inflation. These measures include a possible price cap on Russian oil exports to reduce Moscow's revenues while limiting damage to other economies.

### **India's petroleum products' export falls 1% in May after rising 22% in April**

Export of petroleum products fell 1% in May over the year after rising 22% in April as demand soared in the domestic market, according to the oil ministry data. India exported 5.7 million metric tonnes (MMT) of petroleum products in May, 6% higher than in April but 1% lower than in May 2021. Imports increased 14% to 3.2 MMT in May over the year, compared to 3.8 MMT in April. Net export contracted 0.4 MMT during the month over the year. Indian refiners have been working overtime to meet the soaring fuel demand. The average run at Indian refineries has jumped to 110% in May from 93% a year. Declining net export of refined fuel suggests the domestic market, where demand soared 24% over the year in May, is gobbling most of the output. Diesel and petrol make up three-fourths of India's petroleum products exports in volume terms while LPG comprises 40% of the imported fuels. In value terms, exports nearly doubled to \$6.5 billion over the year in May while imports rose nearly two-thirds to \$2.3 billion. Refiners processed 5.35 million barrels per day (mb/d) of crude in May, compared to 4.49 mb/d a year earlier.
